

# Chinwike Anthony Maduabuchi

Full stack Web Developer

[My website](#)

[chinwikedev@gmail.com](mailto:chinwikedev@gmail.com)

## SKILLS

---

**Programming Languages:** JavaScript, TypeScript, SQL, Bash, HTML5/CSS3.

**Libraries and Frameworks:** React.js, Next.js, TailwindCSS, Node JS, Express.js, Prisma, React Testing Library.

**Databases:** MongoDB, Postgres, Firebase, Redis.

**Developer Tools:** Git & GitHub, VS Code, Slack, Trello.

## PROFESSIONAL EXPERIENCE

---

**LogRocket** ([logrocket.com](https://logrocket.com)):

December 2020 – Date

Technical Writer

*Remote. Boston, US.*

- I collaborate with a cross-functional team of editors to author and publish frontend development, UX design, and mobile development content. Read my [15+ technical articles](#).
- Conducted routine content audits on technical articles to ensure they are updated with recent software releases.
- Conducted keyword research that resulted in top-ranking Google SERP placements for targeted keywords, including "user authentication with Redux" and "React responsive nav."

**Wekiwork Creative Labs** ([DTH Africa](https://dth.africa)):

September 2023 – Date

Frontend Developer (Youth Corps Member)

*Abuja, Nigeria*

- Built the frontend for the in-house finance app from scratch.
- Implemented payment features on the Next.js backend using the Paystack API.
- Led user flow design sessions to streamline the onboarding process, significantly reducing the number of steps required.
- Documented the codebase comprehensively to enhance team understanding and code maintainability.

**Brydge HQ** ([brydgehq.com](https://brydgehq.com)):

Nov 2022 – Feb 2023

Frontend Developer (Freelance)

*Remote. Lagos, Nigeria*

- Translated Figma designs into functional Login, Signup, Forgot Password and OTP-verification pages.
- Setup Docker locally to consume a Python backend with a Postgres database.
- Implemented session authentication on the Next.js front-end while tackling security concerns like rate-limiting, input validation and CSRF attacks.
- Worked remotely with a cross-functional team in an agile environment, and managed tasks with Notion and Asana.

## PERSONAL PROJECTS

---

**[Dentist Direct](#):**

April 2024

- Creating an appointment scheduling software tailored for dentists and their patients, allowing patients to pay for time slots on the dentist's calendar to book appointments.

**[Redux User Auth](#):**

July 2022

- Created a project that demonstrates how to build and manage an authentication workflow using the MERN stack (MongoDB, Express.js, React.js and Node.js)
- Implemented Redux Toolkit for global state management and RTK Query for streamlined data fetching.
- This repository has gotten over 2,500 unique views, 70+ stars and 40+ unique clones on GitHub.

**[Web3 Wallet](#):**

- Created a Web3 Wallet interface using the Laravel Breeze starter kit for Next.js.
- Leveraged the CoinGecko API to consume and render live market data for various cryptocurrencies.
- Used Chart.js to render a line graph that represents the dataset from the CoinGecko API.

## CERTIFICATIONS & ACHIEVEMENTS

---

- Udemy Modern JavaScript From The Beginning | [Certificate](#) November 2020
- Udemy React Front To Back | [Certificate](#) June 2021

## EDUCATION

---

**Nnamdi Azikiwe University, Awka, Anambra state, Nigeria:**

Bachelor of Engineering (B.Eng.) in Electronic and Computer Engineering.  
2<sup>nd</sup> Class Honours.

Dec 2021
